RESEARCH POLICY

FOR

ETHICS AND PLAGIARISM

The goal of this policy is to promote scientific research by providing the code of ethical practices for individual and collaborative work, and guidelines for author, patenting policies.

- 1. It focuses on the disciplines that study norm and standards of conduct such as, Philosophy, Law, Psychology, Sociology, and Science and distinguish between acceptable and unacceptable behavior that suit their particular aims and goals.
- 2. There should be honesty in collection of data, data analysis and interpretation, methods and procedure, result writing, and publication status and other aspects of research where objectivity is expected or required which should not affect the research which is open to criticism and new ideas.
- 3. It should be done confidently, sincerely and there should be consistency of thought and action.
- 4. A proper honor is given to patent, copyrights, and other forms of intellectual property. Do not use unpublished data, methods, or result without permission. Give proper acknowledgement or credit for all contributions to research.
- 5. Show proper respect and care for life forms when using them in research. Do not conduct unnecessary or poorly designed experiments, relevant laws and institutional and governmental policies.
- 6. The research should not be in the form of misconduct or FFP i.e. "fabrication, falsification or plagiarism"
- 7. If any researcher is found to be guilty of plagiarism is liable for severe punishment.
